CIRCULAR

Subject: Deployment of Post-Graduate Medical Students under the District Residency Programme (DRP) in recent Flood-Affected Regions reg.

The District Residency Programme (DRP) for post-graduate medical students provides an opportunity to understand the healthcare needs of people at the field level. In view of the recent floods/disaster-like situations in the northern States/UTs of the country, there is an urgent requirement for healthcare professionals as part of the ongoing relief measures. This initiative will not only provide much-needed healthcare services at the field level but will also enable young medical professionals to gain meaningful experience in disaster response, public health management, and community service, thereby enhancing their overall training. The Ministry of Home Affairs has also appealed for healthcare services to be strengthened through available resources, and several post-graduate doctors have expressed their willingness to volunteer their services.

2. Considering the unique opportunity for both learning and service, the National Medical Commission recognizes this as a valuable component of postgraduate training. Accordingly, the deployment of post-graduate medical students in the flood/disaster-affected areas of northern States/UTs shall be considered as part of the District Residency Programme training. The Nodal Officers of the respective States/UTs may do such postings of students undergoing DRP posting as per the requirement.

(Dr. Vijay Oza)
President, PGMEB
