Subject: To upgrade the Internet bandwidth speed for integration of 25 nos. of cameras installed in Medical Colleges/Institutions in Command & Control Centre of NMC - regarding.

References:

(i) NMC's Advisory No. NMC/DS(NMC)/Misc/2022-406 dated 27.7.2022
(ii) NMC's letter No. D-130024/07(3)/2022/NMC/DMMP dated 27.8.2022

Dear Madam/Sir,

Kindly refer the aforementioned letters issued by National Medical Commission regarding installation of CCTV cameras in Medical College premises. As the activity of CCTV cameras installation in Medical Colleges and sharing the live feed with Command & Control Center is in progress, a major concern regarding internet bandwidth from Medical Colleges came into our notice while integrating the live feed in Command-and-Control Center with the existing speed.

2. Referring to the point no. 3 of NMC's letter dated 27.8.2022 wherein it was mentioned that based on the service availability, performance and reliability, Colleges may use existing bandwidth (MBLS or ILL) and in event of any future bandwidth requirement, NMC will inform the colleges.

3. The post implementation experience suggest that the existing internet speed of the medical colleges have not sufficed the purpose of the DMMP – II project. Hence, the Command & Control Center is not able to configure/view the live feed from colleges/institutions completely.

4. The matter has been deliberated and it has been decided that medical colleges/institutions need to upgrade their internet bandwidth with minimum speed of 100 Mbps (dedicated) to have an uninterrupted live feed to National Medical Commission.

5. All Medical colleges have to follow the above mentioned guidelines/ specifications while procurement of Internet Lease Line (ILL).

6. This issues with the approval of Chairman, NMC.

Yours kindly,

(Pankaj Agrawal)
Director, NMC
